MASTER SCENE REMOTE - for RTS2020/40 SKU: 00189

BENEFITS: Can control up to 20 light switches, Can set 3 scenes, Can turn off or on all the lights at once, Can turn on or off lights individually. Ideal if you more than 3 remote light switches in your home.

WHAT IS A SCENE? A scene, for example may be a pattern of lights that you would like to on or off. eg. You want the landing, hallway and one of the bedroom lights to be on when you leave the house at night. This can be done easily by setting the remote scene to A to switch the 3 sets of lights on, whilst turning everything else off with the touch of only one button. How easy...

Touch only & LED compatible models available - call for details

WIREFREE

Easily-install a light switch to “impossible” & “impractical” places without re-wiring

The Completely Wireless Switch is ideal for adding a light switch to the porch, conservatory, loft, partition walls - or anywhere you want a switch but previously thought difficult –without the need for expensive re-wiring.

You simply attach the Wireless Touch light switch to your wall without connecting to any live wires, and you get an additional light switch anywhere you want to put one without having to rewire the house! All it needs is a 9.5V battery (included) to power switch.

The 2 Way Wireless Touch switch needs to be paired with a WIRED Touch & Remote switch (sold separately), and then it works in the same way as a remote control, with a range of up to 20m.

Wirefree
9.5V battery powered

Ideal solution for:

- Bedside light switch
- Porches
- Bathrooms
- Extensions
- Conservatory
- Loft conversions
- Garden lights
- Mobility applications
- Kitchen Islands
- Making easier to reach
